Mike –

Actually, as I'm going through emails this morning, I see that Debra did, in fact, relay those specific drinking water and ground water beans to EFED. Therefore, I think that the misleading message to you was a "cut and paste" and simply hadn't been modified and/or tailored for HED, thus creating the confusion. Nonetheless, let us know if you have any remaining questions, and we'll look forward to the upcoming discussion.

Best,

Marion J.

Thanks, Mike! I believe that Debra had intended upon sending out the original message to EFED as well; so, I appreciate your catching that it had not been relayed to them. We'll take of it shortly.

Best regards,

Marion J.

**Subject:** Aldicarb new uses - HED BEAN

Hi,

Attached is the BEAN for the new use action for aldicarb on citrus (oranges / grapefruit only) grown in Florida and Texas. The proposed labels are attached. We should have labels with the limes and lemons removed, but I have not yet located them and will send them separately once I find them. (Sorry for the inconvenience.)

The tolerance for citrus is still active in the 40CFR, so they are not petitioning for a new tolerance, so no petition was submitted.

The registrant is submitting two new MRIDs (50695601; 50695602; 50780602) for:

1. Drinking water exposure assessment
2. Proposed lateral groundwater flow velocity

Please review the submitted MRIDs and provide DERs, as appropriate and an ecological risk assessment for the additional uses for Aldicarb. I will be setting up a team meeting in the next week to discuss any paths forward or stop the actions. Please let me know if you have any questions. Debra Rate RD/IVB2; 703-306-0309.

Attached are the proposed labels for the EPA Reg. No. 87895-2 (Technical) and 87895-4 (EP); cover letters; data matrices.
